

MAINTENANCE

Very important to select the correct tile for your area.

Clean and sweep your tiles regularly or vacuuming is a great way to clean tiles

Use just a few drops of soap-less detergent or vinegar mixed with warm water as a weekly floor cleaner, unless otherwise recommended.

Do not use abrasive cleaners unless otherwise recommended.

Use good mats at outside doorways to keep the debris outside which may scratch the tile surface.

Use furniture gliders or furniture pads under any furniture which may damage the surface of the tile. If you have high gloss floors, avoid wearing spiked shoes.

Avoid dropping heavy objects onto the tiles. Tiles are not indestructible.
