

## SLIP RESISTANCE

Almost any flooring can be slippery when wet, and tiles are no exception. Surface dust can also contribute to this, floor mats help. Floor tiles with a slip resistant can reduce this tendency, but the disadvantage to the slip resistant tile is the rough surface being more difficult to clean.

## CLEANERS & SEALANTS

There is no point in spending money on tiles and products if you do not invest in the correct cleaners and sealants to protect your products. Tiles should be looked at as an investment and a durable product. And while tiles require minimal maintenance, there are certain cleaners and sealants that we recommend to use to ensure maximum use.

### Why invest in cleaners and sealants?

- To ensure durability and get the most of our your tiles
- To clean your tiles with the most appropriate solution
- A small cost to ensure longevity
- Easy, fast and effective cleaning
- Ensure a space where you spend majority of your time is hygienic

It is important to note that cleaners and sealants vary depend on the surface used. For example, floor and wall tiles, outdoor floor tiles bathroom tiles and kitchen tiles may require different products.
